Professional Summary

Senior Software Engineer with over 16 years of experience in long-term, enterprise-grade projects, specializing in **Java 17**, **JavaScript**, and **Python** for distributed backends and microservices. Developed B2B money transfer platforms using **React 18**, **Oracle JET**, **Oracle SQL**, **PostgreSQL**, and **SQL Server**, integrating secure **RESTful APIs** and **cloud-native** solutions on **AWS** and **OCI**. Reduced defect counts by **75%** and processing time by **70%** through robust **TDD**. Exceptional communicator, leading cross-functional teams and mentoring engineers to deliver scalable data-driven applications.

Skills

Backend: Java 17, Python, Oracle SQL, PostgreSQL, SQL Server, Spring

Frontend: JavaScript ES6, React 18, React Hooks, Oracle JET, TypeScript, Redux

DevOps: Maven, WebLogic, Linux/Unix, Docker, Kubernetes, GitLab

Security: OAuth, SAML, OpenID, JWT, RBAC, Okta

Soft Skills: Excellent Communication, Technical Leadership, Mentorship, Cross-Functional Collaboration, UI/UX Design, Web Accessibility (A11y)

Other: TDD, Jest, JUnit, ESLint, Microservices, RESTful APIs

Professional Experience

Convera - Senior Software Engineer - Tech Lead

Remote, NY, USA | January 2024 - Present

- Architected **Java 17**-based **microservices** with **Spring** and **PostgreSQL** for a B2B money transfer platform, delivering scalable **RESTful APIs** and presenting architectures to stakeholders.
- Developed data-driven **Python** scripts and **PostgreSQL** schemas for real-time transaction processing, optimizing data retrieval.
- Led development of responsive **SPA** solutions using **React 18** with **functional components**, **React Hooks**, legacy class components, and wrapper components, collaborating with teams on requirements.
- Designed secure payment APIs using **Express.js** and **Node.js** on **AWS Lambda**, reducing audit resolution time by **30%**.
- Drove agile sprints with **TDD** using **Jest**, **JUnit**, and **Playwright**, reducing defect counts from 8/month to 2/month (**75%** reduction).
- Implemented **ESLint** for **React 18** and **JavaScript/TypeScript** code quality, ensuring maintainable microfrontends.
- Integrated **OAuth** SSO with **Okta**, implementing **RBAC** and **JWT** for secure internal tooling.
- Implemented **GitLab** CI/CD pipelines with **Docker** and **Kubernetes** on **AWS**, presenting strategies to cross-functional teams.

Oracle America - Principal Software Developer

Remote, NY, USA | February 2017 - January 2024

- Developed distributed backends over 6 years using **Java 17**, **Spring**, **Hibernate**, and **WebLogic**, integrating **Oracle SQL** to reduce processing time by **70%**.
- Designed data models with **Oracle SQL** for enterprise systems, optimizing complex data structures and presenting designs to leadership.
- Built **React** and **Oracle JET SPA** solutions with **Redux**, reducing support tickets by **47%** over sustained projects.
- Implemented **SAML** and **OpenID** authentication via **WebLogic** on **OCI**, enabling secure **SSO** with **JWT**.

- Utilized **Jenkins**, **Docker**, **Kubernetes**, and **Maven** for CI/CD in **Linux/Unix** environments, enhancing scalability.
- Mentored engineers through code reviews, communicating **Java** and **React** best practices to junior team members.

Oracle America - Senior Software Engineer

Remote, NY, USA | July 2013 - February 2017

- Designed distributed backend applications using **Java**, **Spring**, and **Hibernate**, leveraging **Maven** for build automation over 4 years.
- Developed frontend solutions using **JavaScript** and **Oracle JET**, presenting solutions to stakeholders for enhanced engagement.
- Performed **Linux/Unix** system administration, ensuring system reliability for enterprise clients.

Oracle America - Software Engineer

Remote, NY, USA | January 2010 - July 2013

- Developed **JavaScript** libraries and **PHP**-based services with **MySQL**, streamlining embeddable applications over 3 years.
- Implemented **SSO** authentication using **PHP** and **PERL**, enhancing security.

Oracle America (Previously Primavera) - Technical Support Engineer

Remote, NY, USA | October 2008 - January 2010

- Supported enterprise applications using **SQL Server** for database queries, resolving technical issues for clients.
- Authored automation scripts, improving support efficiency over 1.5 years.

Side Projects

JSON-to-PostgreSQL Schema Sync

Personal Project | 2025 - Present

- Developed a **Python** application to parse JSON files and reverse-engineer data sources, dynamically creating or updating **PostgreSQL** database schemas for predictable report design.
- Implemented logic to detect and add missing columns in existing tables, enabling direct testing of complex **SQL** data structures.
- Automated creation of **SQL** indexes and primary keys based on JSON structure analysis, optimizing query performance.

Resume and Application Tracking System

Personal Project | 2025 - Present

- Developed a **React SPA** using **Next.js**, **Golang**, and **PostgreSQL** for efficient job application tracking.
- Designed **RESTful APIs** with **JWT** authentication, enhancing data security and scalability.
- Integrated **TypeScript** and **React Hooks** for responsive, user-friendly interfaces.

Education

Bachelor's Degree in Computer Science (Network and Communications)

DeVry University, Fort Washington, PA, USA | September 2002 - March 2007

Relevant coursework: Object-Oriented Programming, Java Development, Digital Logic, Project Management
